## Airport Directory

2023 - 2025

3000 copies of this document were printed by the SD Department of Transportation at a cost of \$4.25 per document.

## STATE OF SOUTH DAKOTA AERONAUTICS COMMISSION

700 E. BROADWAY AVE.  
BECKER-HANSEN BUILDING  
PIERRE, SD 57501

**CHRIS FUNK**  
**ERIC ODENBACH**  
**KASSIDY NELSON**  
**ROLF JOHNSON**  
**BOB HUGGINS**  
**JOHN TAYLOR**  
**GERALD RIEBER**

We invite you to explore South Dakota, the land of “Great Faces. Great Places.” From border to border, our beautiful state offers stunning landscapes, friendly people, and a great place to live and do business.

The state’s 70 public-approved airports provide easy access to all that South Dakota offers, from full service FBOs and commercial air travel for the public, to small quiet airfields that are perfect stop off points for a cross country adventure. These airports connect pilots to a vast array of opportunities; from flying the blue skies of the scenic Black Hills, to traveling to the fishing and hunting paradises in the central part of the state, to flying to the prairies and glacial lakes area in northeastern part of the state, to traveling to the southeastern part of our great state to do business in many of our thriving communities.

This directory is intended to provide useful VFR flight information for South Dakota airports and aviation facilities that are located throughout the state. The information in this directory has been compiled from several sources, including airport inspections, FAA publications, and airport owners and managers. The information was current at the time of publication. The status of airport facilities, conditions, available services, ownership, and manager data are constantly changing. The South Dakota Department of Transportation assumes no responsibility for incomplete or inaccurate information contained in this directory. Pilots are reminded it is their responsibility to check FAA Notice to Airmen (NOTAMS), the Airman’s Information Manual (AIM), FAA Flight Service Stations, and current airport conditions with the airport owner/manager before conducting any flight operations.

We hope the information contained in this directory is valuable to you for flight planning and enables you to make your flight in South Dakota an enjoyable experience. May you be blessed with safe and pleasant flying while traveling the wide-open skies of the great state of South Dakota!

Sincerely,

Joel Jundt,  
Secretary South Dakota Department of Transportation

The Airport Directory was prepared using the best information available to the Department of Transportation. The State of South Dakota does not assume responsibility for inaccurate or incomplete information contained herein due to problems in reporting and ever-changing airport conditions and service facilities. Please refer to the FAA's Chart Supplement and contact Flight Service to determine current conditions at airports.

Any corrections or suggestions you would care to make that would help to improve the South Dakota Airport Directory will be greatly appreciated.

# Aircraft Registration

SDCL 50-11-9 and 50-11-11 requires that all aircraft based and operated in South Dakota be registered annually with the Department of Transportation. The deadline for annual registration is March 31 each year. The following chart shows the calculated annual fee based on the age and weight of your aircraft.

## Schedule of Aircraft Annual Registration Fee

<b>Weight Class (Max Gross Takeoff Wt.)</b>	<b>Aircraft New – 9 Yrs.</b>	<b>Aircraft 10 Yrs. Plus</b>
0 – 1,500	\$ 25.00	\$ 12.50
1,501 – 2,000	\$ 40.00	\$ 20.00
2,001 – 3,000	\$ 55.00	\$ 27.50
3,001 – 4,000	\$ 70.00	\$ 35.00
4,001 – 5,000	\$ 85.00	\$ 42.50
5,001 – 6,000	\$100.00	\$ 50.00
6,001 – 10,000	\$125.00	\$ 62.50
10,001 – 12,499	\$150.00	\$ 75.00
12,500 – 15,000	\$200.00	\$100.00
15,001 & Over	\$300.00	\$150.00

Owners or lessees of new or used aircraft not previously registered in this state must, within 30 days of operation, register such aircraft with the South Dakota Department of Transportation. If taxes and penalties are due, annual registration of the aircraft may not be completed without collection of those taxes. Failure to pay the registration tax is a Class 2 misdemeanor. In addition, failure to pay the registration tax within 90 days of the due date shall result in a civil penalty of one-half percent of the tax due for each month, or portion of the month, until the tax is paid, not to exceed five percent of the tax due.

The Original Aircraft Registration form can be found on the following page or you can find it on the internet at: [dot.sd.gov/transportation/aviation/office-of-aeronautics-services](http://dot.sd.gov/transportation/aviation/office-of-aeronautics-services). Please complete the form as fully and accurately as possible.

If you have any questions or need additional information, please feel free to contact the Office of Aeronautics at (605) 773-4430 or send an email to Nancy Hiller at [nancy.hiller@state.sd.us](mailto:nancy.hiller@state.sd.us)

# Aircraft Original Registration Application

## PILOT WEB TIP CARD ICAO FLIGHT PLAN FILING

The Leidos Pilot Web ICAO flight plan form is fully FAA and ICAO compliant. This, combined with help dialogs, Aircraft Equipment and Airport Identifier search windows, makes the Pilot Web ICAO flight plan form a quick, easy and effective way to familiarize yourself with, and file the ICAO flight plan.

<b>Draft</b>						<b>Domestic   ICAO</b> <input checked="" type="checkbox"/>

### SFRA and FRZ Flight Plans

SFRA Flight Plans may be entered in their appropriate format using the Leidos Pilot Web. Ensure proper format is followed.

Flight plans intersecting the DC Flight Restricted Zone (DC FRZ), please contact the Washington Air Route Traffic Control Center Flight Data Unit (703-771-3476) to File, Amend or Activate FRZ Flight Plans.

<p>AIRCRAFT ID is 1 letter followed by 1-6 alphanumeric characters. May also enter approved call signs and flight identifiers, such as CAP1073.</p>	<p>FLIGHT RULE is VFR, IFR, YFR, or ZFR. IFR and VFR are understood; however, for YFR and ZFR know the following: YFR is for flights starting as IFR, then change to VFR. ZFR is for flights starting as VFR, then change to IFR.</p>	
<p>FLIGHT TYPE is 1 letter and may be: S for scheduled air service. N for non-scheduled air transport. G for general aviation. M for military. X for other flight types.</p>	<p>AIRCRAFT TYPE is 1 letter followed by 1-3 alphanumeric characters. If unsure of aircraft type, place ZZZZ into the field and explain in the Other Information field with TYP/.</p>	<p>WAKE TURBULENCE auto-populates the correct aircraft wake turbulence category upon tabbing out of the AIRCRAFT TYPE field.</p>
<p>AIRCRAFT EQUIPMENT requires accurate entry of all radio, navigation and approach equipment. The following are general guidelines to consider when filing:</p> <ul style="list-style-type: none"> <li>•An equipment entry of N establishes what an X would do for domestic. It tells ATC that your aircraft is equipped with NO RADIOS or NAV EQUIPMENT.</li> <li>•An equipment entry of S establishes the standard set of equipment of VOR receiver, VHF radiotelephone, and an ILS receiver.</li> <li>•If equipped with DME this must be entered as D. This is not encompassed by other equipment entries.</li> <li>•If equipped with GPS or GNSS, an entry of G is required.</li> <li>•Equipment R is required for RNAV performance-based navigation. An entry of R in the equipment field will require further data entry into the Other Information field. The flight plan form will auto-populate PBN/ into the Other Information field as a placeholder for you to enter appropriate PBN values.</li> <li>•An entry of Z for OTHER will also require further data entry into the Other Information field, generally prefixed by NAV/, COM/ or DAT/.</li> </ul>		
<p>DEPARTURE, DESTINATION &amp; ALTERNATES are entered into their respective fields and all have the same format. 4 letter ICAO airport/heliport or ZZZZ for a non-standard ICAO airport location. If ZZZZ is entered, then a location must be provided in the Other Information field (DEP/, DEST/, ALTN/). Example: if departure airport is W42, then Departure field is ZZZZ and location in Other Information is DEP/W42.</p>		<p>CRUISING SPEED accepts speeds in the following formats: Knots, entered as N, then 4 digits, e.g., N160. Mach, entered as M, then 3 digits, e.g., M050.</p>
<p>LEVEL is the ICAO equivalent to altitude in the domestic flight plan form. Entries in this field include: Altitude is for altitudes below 18,000 feet and entered in hundreds of feet, e.g., A095. Flight level is for flights at or above 18,000 feet and entered in hundreds of feet such as F240. VFR may be entered to indicate varying VFR altitudes</p>	<p>SURVEILLANCE EQUIPMENT is only for transponder and/or ADS equipment entries. An entry of N denotes no surveillance equipment, which tells ATC that your aircraft is equipped with NO TRANSPONDER or SURVEILLANCE EQUIPMENT.</p>	
<p>ROUTE OF FLIGHT accepts a combination of published routes, latitude/longitude, and/or fixes. A published route should be preceded by a fix that is published on the route, indicating where the route will be joined. The published route should be followed by a fix that is published as part of the route, indicating where the route will be exited. SIDs and STARs may also be entered using a published transition fix.</p>		
<p>OTHER INFORMATION can be considered the catch all for the ICAO flight plan. Any information or data that needs further clarification or supporting details should be entered into this field. As mentioned previously, the Other Information field is the location for data such as PBN values prefaced with a PBN/. Also detailed aircraft type, departure, destination or alternate locations should be entered here if ZZZZ was used in their respective fields prefaced by their proper identifier. Similar to the domestic flight plan, plain language remarks are entered here prefaced with RMK/.</p>

# SuperAWOS Weather Reporting

**(For advisory use only)**

SDDOT and the Aeronautics Commission have purchased 20 SuperAWOS™ units that have been installed at airports throughout South Dakota. These units provide valuable weather reporting services at smaller airports that do not qualify or cannot afford to install and maintain traditional AWOS equipment.

SuperAWOS provides altimeter and visibility measurements, as well as other advisory information such as temperature, dew point, humidity, density altitude, ceiling and wind.

SuperAWOS data is available on the airport's Common Traffic Advisory Frequency or other designated frequency, on the web at <http://potomacaviation.com/select.php>, or by phone at 617-262-3825. When calling, the automated system will ask you to enter the airport's 3-letter identifier. You may enter another airport's identifier at any time for weather from another SuperAWOS. Information is also available on XM Weath-er©. SuperAWOS data is advisory only.

Please send any comments or report problems to the airport's manager or to the SDDOT Office of Aeronautics.

When flying into an airport with SuperAWOS, key your mike for AWOS advisories or lights.

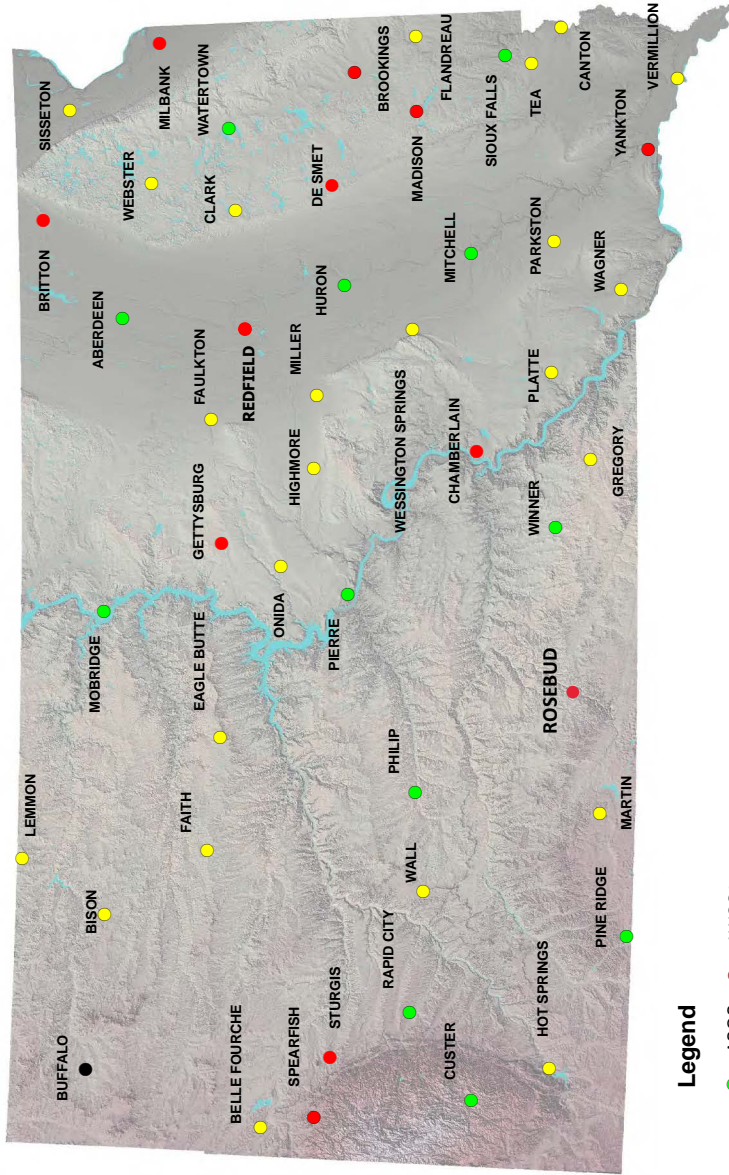

Key Mike:

3 times: low intensity lighting  
5 times: medium intensity lighting  
7 times: high intensity lighting

3 times: SuperAwos advisory  
4 times: Radio check.

You must transmit to get a reply.

# WEATHER REPORTING AT SOUTH DAKOTA AIRPORTS

- Legend**
- ASOS
  - AWOS2
  - AWOS3
  - NWS

## Ground Communication Outlets

GCOs (Ground Communications Outlet) have been installed at 16 airports in South Dakota: Britton, Brookings, Chamberlain, Gregory, Hot Springs, Huron, Lincoln County, Madison, Miller, Mobridge, Platte, Spearfish, Sturgis, Vermillion, Winner and Yankton. Each unit will use 121.725.

A GCO is a non-staffed, remotely controlled ground to ground communications facility. Pilots may contact ATC (Minneapolis or Denver Center) or FSS (Flight Service Station like Huron Radio) via standard VHF aviation frequencies through a telephone connection to obtain an instrument clearance, or to activate or close an VFR or IFR flight plan. You may also get an updated weather briefing prior to takeoff. At an airport with a GCO, pilots will generally use 6 "key clicks" on 121.725 to contact FSS, and 4 "key clicks" to contact an ATC facility. See the table below for airport-specific use.

Because the GCO frequency will be shared throughout the area, the GCO should only be used on the ground. Use in the air will cause interference with other GCOs.

To Use: Change frequency to 121.725. To contact FSS, key your mic 6 times. This will initiate a telephone call to Flight Service. To contact ATC, key your mic 4 times. Once the specialist answers the telephone, identify your aircraft and airport, and state your request. Use standard radio procedures, but note; **YOU MUST KEY YOUR MIC ONCE EVERY MINUTE WHILE THE SPECIALIST IS PAUSING, OR THE CALL WILL DISCONNECT.** When completed, the call will disconnect after one minute. If this process fails, please file a PIREP.

**GCOs are to be used only while on the ground.**

Airport and number of clicks for each service:

Airport	4 Clicks	6 Clicks
Britton	Minneapolis Center	Flight Service
Brookings	Minneapolis Center	
Chamberlain	Minneapolis Center	Flight Service
Gregory	Minneapolis Center	
Hot Springs	Denver Center	Flight Service
Huron	Minneapolis Center	Flight Service
Tea – Lincoln County	Sioux Falls Tower	
Madison	Minneapolis Center	Flight service
Miller	Minneapolis Center	Flight service
Mobridge	Minneapolis Center	
Platte	Minneapolis Center	Flight Service
Spearfish – Black Hills	Ellsworth Approach	Denver Center
Sturgis	Ellsworth Approach	Denver Center
Vermillion	Minneapolis Center	
Winner	Minneapolis Center	
Yankton	Minneapolis Center	Flight Service

## Key to Aerodrome Forecast (TAF) and Aviation Routine Weather Report (METAR) (Front)

<b>TAF</b> KPIT 091730Z 0918/1024 15005KT 5SM HZ FEW020 WS010/31022KT FM091930 30015G25KT 3SM SHRA OVC015 TEMPO 0920/0922 1/2SM +TSRA OVC008CB FM100100 27008KT 5SM SHRA BKN020 OVC040 PROB30 1004/1007 1SM -RA BR FM101015 18005KT 6SM -SHRA OVC020 BECMG 1013/1015 P6SM NSW SKC
<b>NOTE:</b> Users are cautioned to confirm <i>DATE</i> and <i>TIME</i> of the TAF. For example FM100000 is 0000Z on the <b>10th</b> . Do not confuse with <b>1000Z!</b>
<b>METAR</b> KPIT 091955Z COR 22015G25KT 3/4SM R28L/2600FT TSRA OVC010CB 18/16 A2992 RMK SLP045 T01820159

Forecast	Explanation	Report
<b>TAF</b>	Message type: <u>TAF</u> -routine or <u>TAF AMD</u> -amended forecast, <u>METAR</u> -hourly, <u>SPECL</u> -special or <u>TESTM</u> -non-commissioned ASOS report	<b>METAR</b>
<b>KPIT</b>	ICAO location indicator	<b>KPIT</b>
<b>091730Z</b>	Issuance time: ALL times in UTC " <u>Z</u> "; 2-digit date, 4-digit time	<b>091955Z</b>
<b>0918/1024</b>	Valid period, either 24 hours or 30 hours. The first two digits of EACH four digit number indicate the date of the valid period, the final two digits indicate the time (valid from 18Z on the 9th to 24Z on the 10 <sup>th</sup> ).	
	In U.S. METAR: <u>COR</u> rected of; or <u>AUTO</u> mated ob for automated report with no human intervention; omitted when observer logs on.	<b>COR</b>
<b>15005KT</b>	Wind: 3 digit true-north direction , nearest 10 degrees (or <u>VaRi</u> able); next 2-3 digits for speed and unit, <u>KT</u> (KMH or MPS); as needed, <u>Gust</u> and maximum speed; 00000KT for calm; for METAR, if direction varies 60 degrees or more, <u>Variability</u> appended, e.g., 180V260	<b>22015G25KT</b>
<b>5SM</b>	Prevailing visibility; in U.S., <u>Statute Miles</u> & fractions; above 6 miles in TAF <u>Plus6SM</u> . (Or, 4-digit minimum visibility in meters and as required, lowest value with direction)	<b>3/4SM</b>
	Runway Visual Range: <u>R</u> ; 2-digit runway designator <u>Left</u> , <u>Center</u> , or <u>Right</u> as needed; " <u>Z</u> ". Minus or Plus in U.S., 4-digit value, <u>FeeT</u> in U.S., (usually meters elsewhere); 4-digit value <u>Variability</u> 4-digit value (and tendency <u>Down</u> , <u>Up</u> or <u>No</u> change)	<b>R28L/2600FT</b>
<b>HZ</b>	Significant present, forecast and recent weather: see table (on back)	<b>TSRA</b>
<b>FEW020</b>	Cloud amount, height and type: <u>SKy</u> Clear 0/8, <u>FEW</u> >0/8-2/8, <u>SCaTtered</u> 3/8-4/8, <u>BroKeN</u> 5/8-7/8, <u>OVeR</u> Cast 8/8; 3-digit height in hundreds of ft; <u>Towering CU</u> mulus or <u>CumulonimB</u> us in <b>METAR</b> ; in <b>TAF</b> , only <u>CB</u> . Vertical Visibility for obscured sky and height "VV004". More than 1 layer may be reported or forecast. In automated <b>METAR</b> reports only, <u>CLear</u> R for "clear below 12,000 feet"	<b>OVC 010CB</b>
	Temperature: degrees Celsius; first 2 digits, temperature " <u>Z</u> " last 2 digits, dew-point temperature; <u>Minus</u> for below zero, e.g., M06	<b>18/16</b>
	Altimeter setting: indicator and 4 digits; in U.S., <u>A</u> -inches and hundredths; <u>Q</u> -hectoPascals, e.g., Q1013)	<b>A2992</b>
<b>WS010/31022KT</b>	In U.S. <b>TAF</b> , non-convective low-level (≤2,000 ft) <u>Wind Shear</u> ; 3-digit height (hundreds of ft); " <u>Z</u> "; 3-digit wind direction and 2-3 digit wind speed above the indicated height, and unit, <u>KT</u>	

## Key to Aerodrome Forecast (TAF) and Aviation Routine Weather Report (METAR) (Back)

	In <b>METAR</b> , <b>ReMarK</b> indicator & remarks. For example: Sea- Level Pressure in hectoPascals & tenths, as shown: 1004.5 hPa; Temp/dew-point in tenths _C, as shown: temp. 18.2 _C, dew-point 15.9 _C	<b>RMK SLP045 T01820159</b>
<b>FM091930</b>	<b>FroM</b> : changes are expected at: 2-digit date, 2-digit hour, and 2-digit minute beginning time; indicates significant change. Each FM starts on a new line, indented 5 spaces	
<b>TEMPO 0920/0922</b>	<b>TEMPO</b> rary: changes expected for <1 hour and in total, < half of the period between the 2-digit date and 2-digit hour beginning, and 2-digit date and 2-digit hour ending time	
<b>PROB30 1004/1007</b>	<b>PROB</b> ability and 2-digit percent (30 or 40): probable condition in the period between the 2-digit date & 2-digit hour beginning time, and the 2-digit date and 2-digit hour ending time	
<b>BECMG 1013/1015</b>	<b>BECOMinG</b> : change expected in the period between the 2-digit date and 2-digit hour beginning time, and the 2-digit date and 2-digit hour ending time	

### Table of Significant Present, Forecast and Recent Weather - Grouped in categories and used in the order listed below; or as needed in TAF, No Significant Weather.

#### Qualifiers

##### Intensity or Proximity

“-” = Light	<b>No sign</b> = Moderate	“+” = Heavy
“VC” = Vicinity, but not at aerodrome. In the US METAR, 5 to 10 SM from the point of observation. In the US TAF, 5 to 10 SM from the center of the runway complex. Elsewhere, within 8000m.		

#### Descriptor

<b>BC</b> – Patches	<b>BL</b> – Blowing	<b>DR</b> – Drifting	<b>FZ</b> – Freezing
<b>MI</b> – Shallow	<b>PR</b> – Partial	<b>SH</b> – Showers	<b>TS</b> – Thunderstorm

#### Weather Phenomena

##### Precipitation

<b>DZ</b> – Drizzle	<b>GR</b> – Hail	<b>GS</b> – Small Hail/Snow Pellets	
<b>IC</b> – Ice Crystals	<b>PL</b> – Ice Pellets	<b>RA</b> – Rain	<b>SG</b> – Snow Grains
<b>SN</b> – Snow	<b>UP</b> – Unknown Precipitation in automated observations		

##### Obscuration

<b>BR</b> – Mist (≥5/8SM)	<b>DU</b> – Widespread Dust	<b>FG</b> – Fog (<5/8SM)	<b>FU</b> – Smoke
<b>HZ</b> – Haze	<b>PY</b> – Spray	<b>SA</b> – Sand	<b>VA</b> – Volcanic Ash

##### Other

<b>DS</b> – Dust Storm	<b>FC</b> – Funnel Cloud	<b>+FC</b> – Tornado or Waterspout	
<b>PO</b> – Well developed dust or sand whirls		<b>SQ</b> – Squall	<b>SS</b> – Sandstorm

- Explanations in parentheses “(O)” indicate different worldwide practices.
- Ceiling is not specified; defined as the lowest broken or overcast layer, or the vertical visibility.
- NWS TAFs exclude BECMG groups and temperature forecasts, NWS TAFS do not use PROB in the first 9 hours of a TAF; NWS METARs exclude trend forecasts. US Military TAFs include Turbulence and Icing groups.

# Federal Aviation Administration

## Getting the Maximum from Personal Minimums

Step 1 – Review Weather Minimums

Step 2 – Assess Your Experience and Personal Comfort Level

Step 3 – Consider Other Conditions

Step 4 – Assemble and Evaluate

Step 5 – Adjust for Specific Conditions

Step 6 – Stick to the Plan!

Category	Ceiling		Visibility
VFR	greater than 3,000 feet AGL	and	greater than 5 miles
Marginal VFR	1,000 to 3,000 feet AGL	and/or	3 to 5 miles
IFR	500 to below 1,000 feet AGL	and/or	1 mile to less than 3 miles
LIFR	below 500 feet AGL	and/or	less than 1 mile

## Baseline Personal Minimums

Weather Condition		VFR	MVFR	IFR	LIFR
Ceiling					
	Day				
	Night				
Visibility					
	Day				
	Night				
Turbulence		SE	ME	Make/Model	
	Surface Wind Speed				
	Surface Wind Gust				
	Crosswind Component				
Performance		SE	ME	Make/Model	
	Shortest runway				
	Highest terrain				
	Highest density altitude				

	If you are facing:	Adjust baseline personal minimums to:	
Pilot	Illness, medication, stress, or fatigue; lack of currency (e.g., haven't flown for several weeks)	Add	At least 500 feet to ceiling
			At least ½ mile to visibility
Aircraft	An unfamiliar airplane, or an aircraft with unfamiliar avionics/ equipment:		At least 500 ft to runway length
enVironment	Airports and airspace with different terrain or unfamiliar characteristics	Subtract	At least 5 knots from winds
External Pressures	"Must meet" deadlines, passenger pressures; etc.		

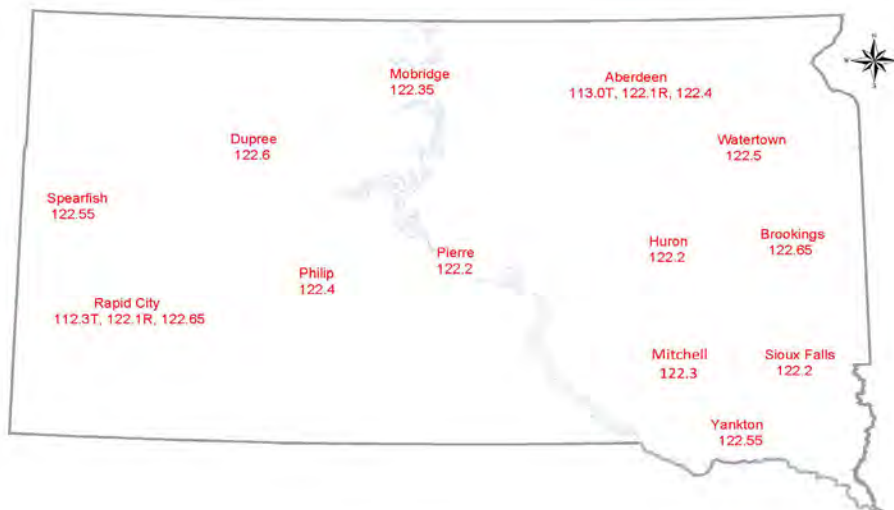

# Flight Service and Air Traffic Control

EMERGENCY FREQUENCY – 121.5 MHz

(Monitored By All Facilities)

Flight Service Stations (FSS's) provide pilot briefings, flight plan processing, en route radio communications, search and rescue services, and assistance to lost aircraft and aircraft in emergency situations. FSS's also relay ATC clearances, process Notices to Airmen (NOTAMs), and broadcast aviation weather and aeronautical information.

Contact Flight Service using remote communications outlets on the frequencies shown below:

# Pilot's Guide to Airport Signs and Markings

## Airport Signs

- B 4-22** TWY/RWY HOLDING POSITION: Hold short of intersecting runway
- 25-7** RWY/RWY HOLD POSITION: Hold short of intersecting runway
- 8-APCH** RWY APCH HOLD POSITION: Hold short of protected area when instructed by ATC
- ILS** ILS HOLD POSITION: Hold short of ILS critical area when instructed by ATC
- ⊖** NO ENTRY: Identifies paved areas where aircraft entry is prohibited
- B** TAXIWAY LOCATION: Identifies taxiway on which aircraft is located
- 22** RUNWAY LOCATION: Identifies runway on which aircraft is located
- 4** RUNWAY DISTANCE REMAINING: Identifies runway length remaining

-  RUNWAY BOUNDARY: Exit boundary from rwy protected area
-  ILS CRITICAL AREA BOUNDARY: Exit boundary of ILS critical area
-  RUNWAY EXIT: Defines direction & designation of exit twy from rwy
-  TWY DIRECTION: Defines direction & designation of intersecting taxiway(s)
- 22↑** OUTBOUND DESTINATION: Defines direction to take-off runway
-  INBOUND DESTINATION: Indicates direction of destination, i.e. terminal or military area
-  TAXIWAY ENDING MARKER: Indicates that twy does not continue beyond this point
-  DIRECTION SIGN ARRAY: Identifies location in conjunction with multiple intersecting taxiways

### Line Up and Wait

has replaced "Taxi Into Position and Hold".

The new language permits entry onto the runway to await further instructions, but is not a take-off clearance.

If ever in doubt about a clearance or taxi instruction, do not hesitate to **ASK FOR HELP!**

## ATCT Light Gun Signals

Color and Type of Signal	Aircraft on the Ground
<b>STEADY GREEN</b> 	Cleared for Takeoff
<b>FLASHING GREEN</b> 	Cleared to Taxi
<b>STEADY RED</b> 	STOP
<b>FLASHING RED</b> 	Taxi Clear of the Runway in Use
<b>FLASHING WHITE</b> 	Return to Starting Point on Airport
<b>ALTERNATING RED/GREEN</b> 	Exercise Extreme Caution

Elevated Guard Lights Hold Short

In-Pavement Guard Lights Hold Short

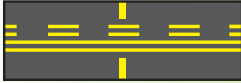

[www.faa.gov/go/runwaysafety](http://www.faa.gov/go/runwaysafety)

# Pilot's Guide to Airport Signs and Markings

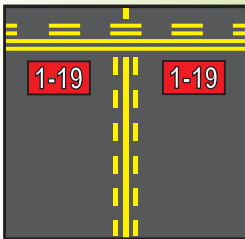

## Airport Markings

**HOLDING POSITION:**  
Hold short of intersecting rwy;  
also a land-and-hold-short marking

**MOVEMENT AREA BOUNDARY:**  
Defines boundary of movement  
area and non-movement area

**HOLDING POSITION WITH  
ENHANCED TAXIWAY  
CENTERLINE:** Alerts of an  
approaching runway

**TAXIWAY/TAXIWAY HOLDING  
POSITION:** Hold short of intersecting  
taxiway when directed by ATC

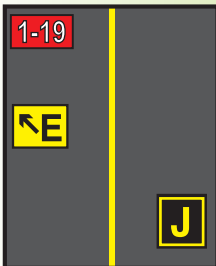

**SOLID TAXIWAY EDGE:** Defines edge  
of usable, full-strength taxiway  
pavement; adjoining pavement  
NOT usable

**ILS CRITICAL AREA:** Hold short  
when instructed by ATC

**DASHED TAXIWAY EDGE:** Defines  
edge of taxiway where adjoining  
pavement or apron IS available  
for taxi

**SURFACE PAINTED HOLDING  
POSITION:** Designates runway ahead in  
conjunction with yellow holding position marking

**SURFACE PAINTED TAXIWAY  
DIRECTION:** Direction &  
designation of intersecting twy

**SURFACE PAINTED TAXIWAY  
LOCATION:** Identifies twy  
on which aircraft is located

605-393-8011

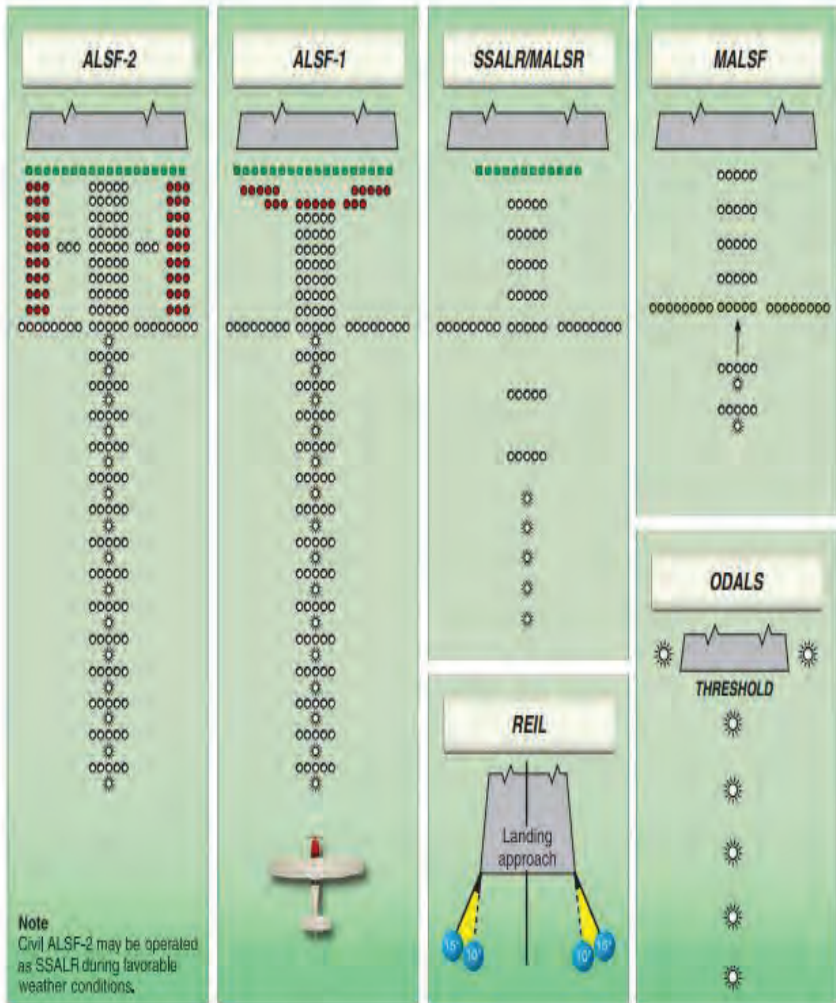

NOTAMs and TFRs: [pilotweb.nas.faa.gov](http://pilotweb.nas.faa.gov)

## National Parks and Rapid City Regional Airport

When flying over Mount Rushmore National Monument, stay above 7700' MSL unless cleared by Ellsworth approach. This is a high traffic area, and caution must be used. Expect CTAF 123.3 to be assigned by Ellsworth Approach. National parks and wildlife refuges are also noise-sensitive areas, so remain above 2000' AGL.

When flying in the vicinity of Rapid City Regional, be aware that Ellsworth Air Force Base is 5 miles northwest of the airport, and is easily mistaken for Rapid City Regional.

**Legend** Flashing light Steady burning light Omnidirectional flashing light

**ALSF**—Approach light system with sequenced flashing lights

**SSALR**—Simplified short approach light system with runway alignment indicator lights

**MALSFL**—Medium intensity approach light system with runway alignment indicator lights

**REIL**—Runway end identification lights (*rapid identification of the ends of the runway*)

**MALSFL**—Medium intensity approach light system with sequenced flashing lights (and runway alignment)

**ODALS**—Omnidirectional approach light system

Runway End Identifier Lights - REIL

Runway Edge Identifier Lights - HIRL (high intensity), MIRL (medium intensity), LIRL (low intensity)

## Communication Requirements and Weather Minimums

Features	Class A	Class B	Class C	Class D	Class E	Class G
Minimum Pilot Qualifications	Instrument Rating	Student*	Student*	Student*	Student*	Student
Entry Requirements	IFR: ATC Clearance VFR: Operations Prohibited	ATC Clearance	IFR: ATC Clearance VFR: Two-Way Communication w/ ATC	IFR: ATC Clearance VFR: Two-Way Communication w/ ATC	IFR: ATC Clearance VFR: None	None
VFR Visibility Below 10,000 msl**	N/A	3 Statute Miles	3 Statute Miles	3 Statute Miles	3 Statute Miles	Day: 1 Statute Mile Night: 3 Statute Miles
VFR Cloud Clearance Below 10,000 msl***	N/A	Clear of Clouds	500 Below 1,000 Above 2,000 Horizontal	500 Below 1,000 Above 2,000 Horizontal	500 Below 1,000 Above 2,000 Horizontal	500 Below 1,000 Above 2,000 Horizontal
VFR Visibility 10,000 msl and Above**	N/A	3 Statute Miles	3 Statute Miles	3 Statute Miles	5 Statute Miles	5 Statute Miles
VFR Cloud Clearance 10,000 msl and Above	N/A	Clear of Clouds	500 Below 1,000 Above 2,000 Horizontal	500 Below 1,000 Above 2,000 Horizontal	1,000 Below 1,000 Above 1 Statute Mile Horizontal	1,000 Below 1,000 Above 1 Statute Mile Horizontal

\* Prior to operating within Class B, C, or D airspace (or Class E airspace with an operating control tower), student, sport, and recreational pilots must meet the applicable FAR Part 61 training and endorsement requirements. Solo student, sport, and recreational pilot operations are prohibited at those airports listed in FAR Part 91, appendix D, section 4.

\*\* Student pilot operations require at least 3 statute miles during the day and 5 statute miles visibility at night.

\*\*\* Class G VFR cloud clearance at 1,200 agl and below (day): clear of clouds. See FAR 91.155(b) through (e) for additional regulations.

## FAA Safety Team (FAASTeam)

The FAASTeam is focused on reducing the number of aviation accidents and incidents through greater educational outreach. Establishing partnerships and encouraging the continual growth of a positive safety culture is essential to maintaining a safe aviation environment. FAASTeam Representatives are voluntary supporters of the FAASTeam and play a vital role in accomplishing the FAASTeam's mission.

These FAASTeam Representatives are selected for their interest in aviation safety. They serve our aviation community sharing knowledge and professional experience in order to create a positive safety culture. FAASTeam Representatives organize and participate in various FAASTeam events, and initiate corrective action regarding unsafe conditions that may be hazardous to persons or aircraft in flight or on the ground.

The FAASTeam is strongly supported by all levels of the Federal Aviation Administration. FAASTeam Program Managers (FPMs) have oversight responsibility and work closely with hundreds of FAASTeam Representatives throughout the United States. If you have any safety issues of concern, please contact your local FAASTeam Representative.

This contact information is subject to change, therefore visit [www.FAASafety.gov](http://www.FAASafety.gov) to obtain the most current list.
